

# About Us

## Introduction

Hicksville Physical Therapy offer HANDS-ON, One-on-One treatments for each individual in order to expedite your recovery. With our Long Island, NY location in Hicksville, we provide a very comfortable, personable, and family oriented atmosphere. Custom supervised exercise programs are developed based on initial examination findings and accommodated toward your individual needs.

After the initial examination process we will carry you through a step by step process of your rehabilitation and instruct you in a home exercise program to be done at home in order to optimize and expedite your recovery. In the unfortunate event that we conclude that we can't help you, we will refer you to a professional who can! We understand that your time is just as valuable as ours.

Our facility has one of the most comprehensive clinical and gym equipment in our new state-of-the-art 3,000 sq ft facility in Nassau County!
